BUILDING SMARTER

Innovative Base Technologies is dedicated to producing the best panel base technology this world has ever seen, and as part of our mission we take great pride in producing high quality and compelling graphical content for you to access and share across your network of clients and potential prospects. This media kit is designed to help in those efforts.

We've spent a lot of time and money trademarking our brand and patenting our technology, we hope you are just as proud as we are to share the IBT family of products quality and reputation with your customers. Our dealer network is a hand-picked elite team that we are extremely proud of and hope you're proud being a part of, too.

We invite you to utilize our logo and media marketing material inside all of your related marketing efforts. Here's where you can use this media kit:

What is panel base technology?

Over 20 years ago we set out on the path of **replacing “Mass with Science”** – In other words, eliminating as much site preparation and construction restrictions as possible yielding **unparalleled speed of installation** all with a single panel solution. With 17 US and International patents issued, **IBT** has secured its position as **the global leader in panel base technologies**.

SAFETY

CONSISTENT PERFORMANCE

LIFE-CYCLE COST

LOAD BEARING

DRAINAGE

INSTALLATION

COST SAVING

SUSTAINABILITY

Innovative Base Technologies' family of products has the smart solution for all of your installation requirements.

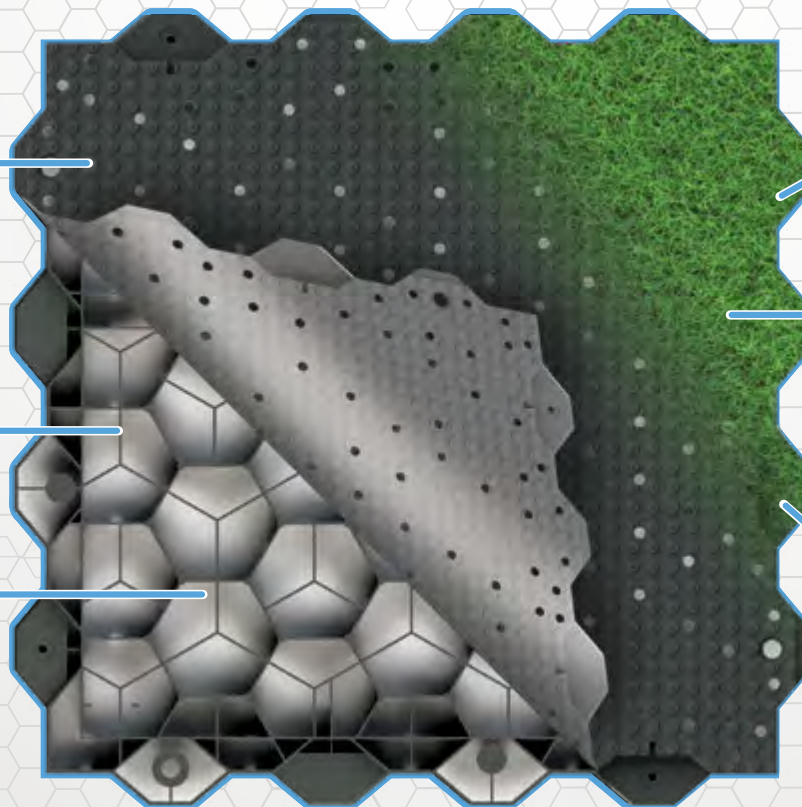

Non-Slide Barbs

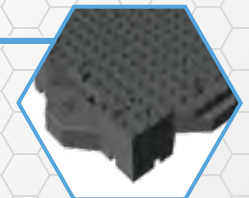

Structural Support Ribs

Horizontal Drainage and Water storage

Perfect Planar Alignment Between Panels

Vertical Drainage

Engineered Locking Expansion Joints

Providing SOLUTIONS is the FOUNDATION of our BUSINESS

Innovative Base Technologies provides a host of innovative products for creating smarter places to work, play and relax by dramatically **reducing** or in many cases **eliminating the need for traditional earth, stone, concrete and asphalt foundations.** Our revolutionary,

patented, inter-locking panel base technology delivers safety, performance, permeable or impermeable drainage capabilities, ease of installation, reusability and structural integrity in a single panel

solution. No other company in the industry has **solved more problems when it comes to providing installation solutions** in virtually any

location around the world. Our product line up provides state-of-the-art foundations for both indoor and outdoor athletic turf fields, playgrounds, putting greens, landscapes, pavers, rooftops, pet areas, dance floors, event displays, recreational areas and numerous other court and floor applications.

Perfection Begins With **ULTRABASE** SYSTEMS®

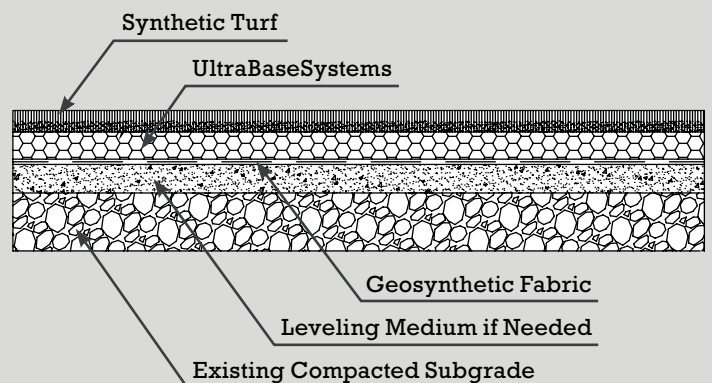

A new era in base construction

is underway with **UltraBaseSystems**. From synthetic turf to concrete pavers, installation has never been this easy and affordable. Engineered to minimize traditional stone base work, **UltraBaseSystems** provides the load-bearing structure, storm water management, safety and performance demanded by every athlete and homeowner.

Indoors or outdoors, temporary or permanent, **UltraBaseSystems** is the perfect solution for installing synthetic turf:

- Athletic Fields
- Golf
- Landscapes
- Pet Areas
- Roof Top Greenscapes
- Playgrounds
- Recreational Areas
- And Much More

PRESENTING Ultra Base **MAX**

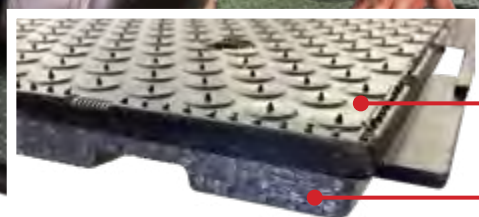

Ultra Base MAX is the perfect fusion of performance and safety. Engineered with the patented UltraBaseSystems® rigid structural shell for performance, fused with a state-of-the-art automotive grade shock absorption foam for safety, UBS MAX delivers what athletes demand.

What Once Seemed
IMPOSSIBLE
is Now **REALITY!**

**Dramatically Improves
Industry Standard for
Performance and Safety**

- Consistent GMAX
- Superior Energy Restitution
- Faster Playing Surface
- Better Drainage
- Easy to Install
- Requires Lower Turf Heights
- Less Infill Required

Rigid Structural Shell

Shock Absorption Foam

Ultra Base MAX Panel
Detail

Shock Attenuation

Impact energy dissipates downward as well as laterally while providing a safe stable feel under foot.

Energy Restitution

Kinetic energy during play is returned to the athlete promoting peak performance.

The Perfect Fusion of SAFETY and PERFORMANCE

Ultra Base Max is our solution to the demand for safer and higher performing base technology.

ULTRA BASE MAX PASSES THE TEST

The testing results were performed by an accredited sports testing facility - all tests were performed over concrete, yielding the following results. The results for all of these tests performed met the requirements for a STC Stadium Field. The requirements for a STC Stadium Field are the same as those specified in the FIFA 2-Star Standard. Test results available by request.

UltraBase MAX - 1" Turf with 1.68 lb/ft2 of Sand & .72 lb/ft2 of Rubber Fill

TEST	SCORE	FIFA 1 STAR (PASS/FAIL)	FIFA 2 STAR (PASS/FAIL)	STC (PASS/FAIL)	INT. RUGBY BOARD (PASS/FAIL)
Force Reduction	70%	PASS	PASS	PASS	PASS

WHAT'S IT ALL MEAN?

Force Reduction

Force Reduction measures the amount of absorption a surface provides at the moment of impact.

Vertical Deformation

Vertical Deformation measures the amount of deflection of a surface as an athlete runs on it. It is an indicator of the speed and stability of the surface.

Energy Restitution

Energy Restitution is a measurement of the amount of energy returning back to the athlete from the surface which dictates the athletes speed, performance and level of fatigue.

Gmax/HIC Shock Attenuation

Gmax is the ASTM official device for measuring the hardness of a surface as it relates to head and body safety.

Rotational Resistance

Rotational Resistance measures the amount of movement of the surface underfoot affecting the athletes ability to change direction reducing the potential for lower leg injury.

HIC Impact Attenuation

HIC calculates the Head Injury Criteria (HIC). HIC is used to predict the potential of head injury resulting from a surface impact.

R-value

R-value measures the insulation potential of a material when subjected to a variety of temperatures.

Vertical Drainage

Vertical Drainage calculates the amount of fluid moving through a material. Measured in inches per hour or gallons per minute per square yard.

Storage Capacity

Storage Capacity determines the volume of liquid able to be stored within the panel. Measured in gallons per panel.

Horizontal Drainage

Horizontal Drainage calculates the amount of liquid which evacuates laterally from the panel. Measured in inches per hour or gallons per minute per square yard.

Ultra Court Panel

Ultra Court Systems' revolutionary panel design provides both the structural base and the playing surface in an All-in-One solution.

- **Structural superiority on virtually any surface**
- **Non-Slip Play Surface**
- **Rapid Surface Drainage**

- **Horizontal Drainage and Water Storage**
- **Perfect Planarity from Panel to Panel**

- **ADA Compliant**
- **Paintable**
- **Easy No-Tool Installation**

Panel Dimensions: Square footage area once installed: 28" x 28" / 711.2mm x 711.2mm

Panel Weight: Average panel weight: 10 lbs. / 4.54 kg per panel

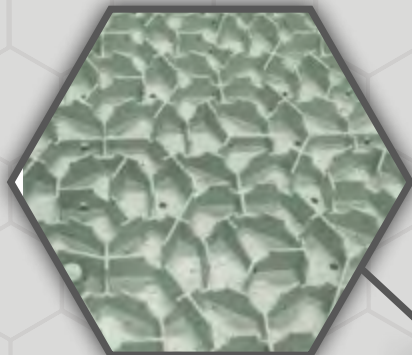

Made in USA from recycled and recyclable materials.

Ultra Floor Systems™ Accessories

By simply utilizing any of the optional accessories shown below, your Ultra Floor Systems panels become a highly functional and finished panel system unlike any on the market today.

Covered Wire Chase Track:

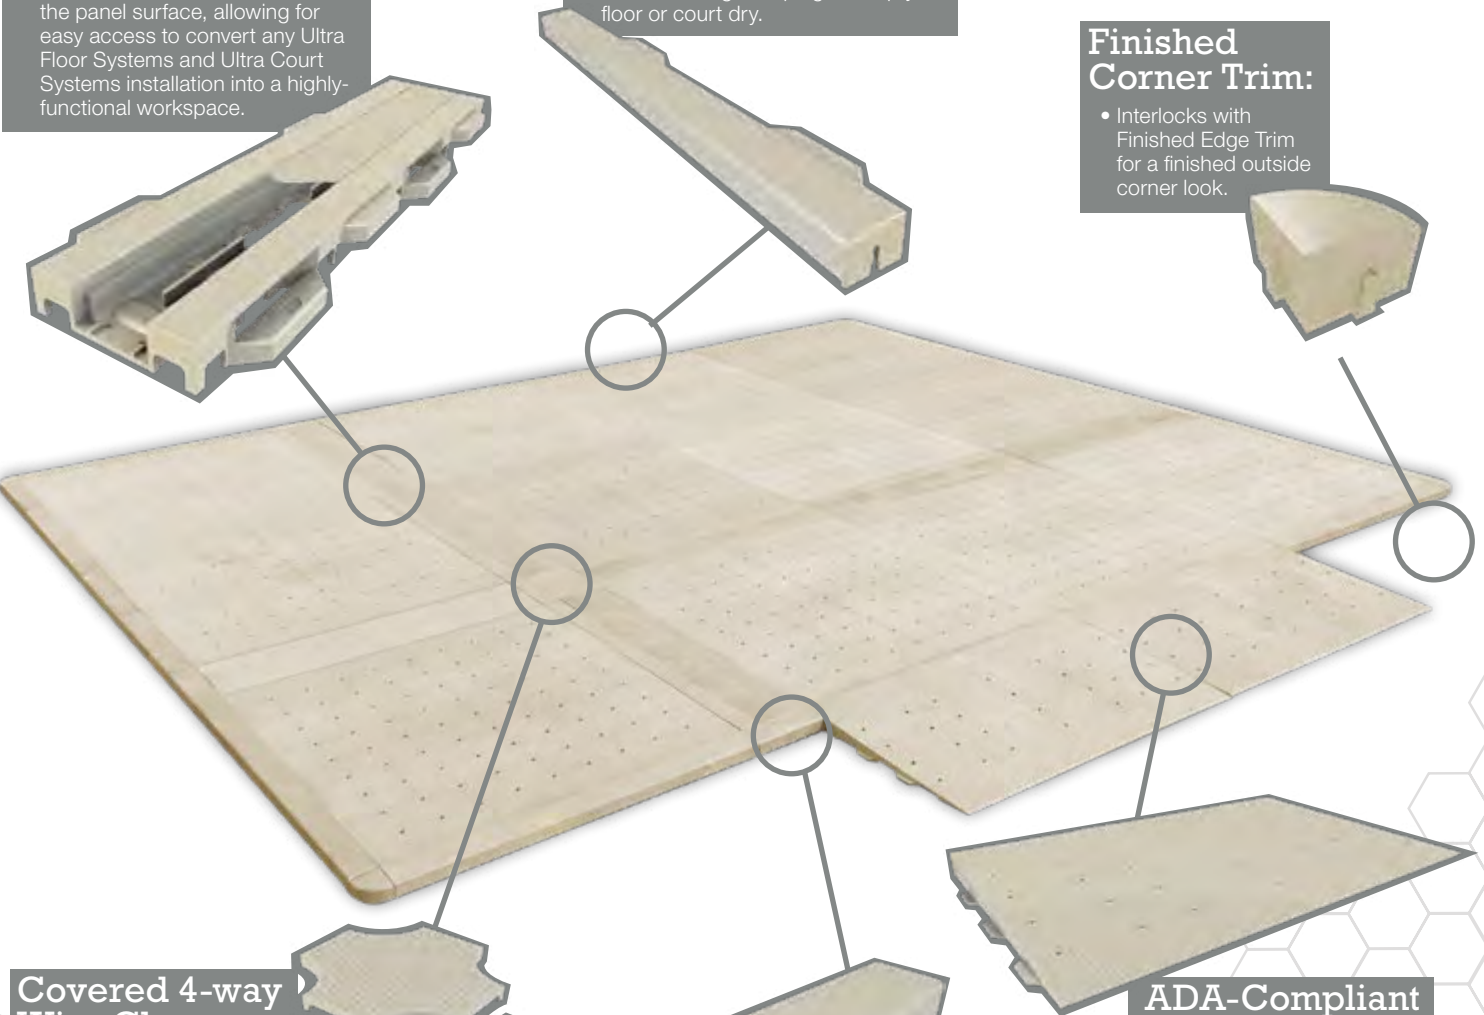

- This self-contained unit hides unsightly wires and cables below the panel surface, allowing for easy access to convert any Ultra Floor Systems and Ultra Court Systems installation into a highly-functional workspace.

Finished Edge Trim:

- Engineered to securely interlock with Ultra Floor Systems and Ultra Court Systems, creating a finished look.
- Designed to allow water run off and under the edge, helping to keep your floor or court dry.

Finished Corner Trim:

- Interlocks with Finished Edge Trim for a finished outside corner look.

Covered 4-way Wire Chase Junction Box with Cover:

- Used in conjunction with the Covered Wire Chase Track, this covered junction box allows for the redirection of wires to provide electrical or cable service where needed.

Wire Chase Track Finished Edge Trim:

- Provides the matching finish for the outer edge of the Wire Chase Track.

ADA-Compliant Ramp:

- Engineered to securely interlock with Ultra Floor Systems and Ultra Court Systems, this ADA-compliant ramp delivers the strength, traction and drainage required to support any motorized wheelchair or maintenance vehicle, making access worry-free.

Tour Links® Pre-Packs

Elevate your putting to a new level on a Tour Links Pre-Packaged putting green.

Our patented Tour Links system includes:

- Meticulously engineered all-weather panels
- Regulation cups so advanced they've earned a U.S. Patent
- Country club speed turf
- Multiple length putts for right or left-handed golfers

All this technology, coupled with a solid feel, will ensure your Tour Links green will last for years and will be your secret to lower scores. Easy installation and assembly in virtually any location will ensure that your Tour Links practice green will be the most valuable tool in your bag. So whether you are a low handicapper or a once-a-month enthusiast, Tour Links has you covered. Real practice, real results—that's Tour Links!

Custom Residential & Commercial Putting Greens

Any size, any shape, any location, any budget—that's Tour Links! From rooftops to gymnasiums, backyards to basements, patios to parking lots, the patented Tour Links Putting Green System makes easy work of any installation.

- Build it for a lifetime or move it week to week, you never lose your investment with Tour Links.
- Years of engineering and global patents makes Tour Links the most trusted name in home practice greens.

WHAT'S IT ALL MEAN?

Vertical Drainage: UltraBase MAX is the only system that allows for the vertical drainage of water. This means that water can be removed from the playing surface and directed away from the hole.

Horizontal Drainage: UltraBase MAX is the only system that allows for the horizontal drainage of water. This means that water can be removed from the playing surface and directed away from the hole.

Reinforced "Drop-In-Lock" Connection System: UltraBase MAX is the only system that allows for the reinforced connection between tiles. This means that the tiles are more secure and less likely to shift or move.

Shock Absorption Membrane: UltraBase MAX is the only system that allows for the shock absorption membrane. This means that the system is more forgiving and less likely to cause injury.

Non-Slip Tuff Borls: UltraBase MAX is the only system that allows for the non-slip tuff borls. This means that the system is safer and less likely to cause injury.
